EDUCATION

University of Information Technology - UIT   Ho Chi Minh, Vietnam
Bachelor of Information Systems; GPA: 3.37   Aug. 2019 – Dec. 2023

CERTIFICATES AMD ACHIEVEMENTS

- TOEIC 725
- AZ900 - Azure Fundamentals
- DP900 - Azure Data Fundamentals
- Udacity: Cloud Developer
- Udacity: Cloud DevOps Engineer
- Udacity: Agile Software Developer

PROFESSIONAL SUMMARY

- Highly skilled IT professional with over 2 years professional experience in website development, implementation, deployment, system integration, internal and customer support.
- Have experience in working for multiple teams and delivering good quality projects for customers in Japan, India and Korea.
- Good Information Technology background knowledge
- Good learning and working attitude, professionalism and high sense of responsibility
- Strong experiences in Typescript, Javascript, NodeJS, HTML, CSS ...
- Flexible, well-organized, analytic thinking, high motivated, adaptable, responsible, logical, practical thinking.
- Proficient in English.

TECHNICAL SKILLS

- **Programming Languages: JavaScript, TypeScript**
- **Frameworks: ReactJS, VueJS, ExpressJS, NextJS, NestJS**
- **Databases: PostgreSQL, MySQL, SQL Server, Oracle**
- **Cloud Platforms: Azure, AWS**
- **Tools: Git, Docker, Kubenetes**

ADDITIONAL LEARNING

- Udemy: React - The Complete Guide 2024 (incl. React Router & Redux)
- Udemy: Next.js 14 & React - The Complete Guide
- Udemy: NestJS Zero to Hero - Modern TypeScript Back-end Development

WORK EXPERIENCE

FPT Software
Software Engineer

Ho Chi Minh, Vietnam
October 2022 - Present

1. Booking System (January 2024 - Present)

- Position: Developer
- Team size: 7
- Technology: VueJS, ExpressJS
- Responsibility:
  - Implemented the booking flow on the guest site, ensuring a seamless and intuitive user experience. Integrated features such as availability search, booking forms to facilitate hassle-free reservations for guests.
  - Developed robust booking management functionalities, empowering administrators to efficiently handle reservations, including creation, modification, and cancellation on the admin site.
  - Integrated mapping APIs from retail vendors into both the admin and guest sites.
  - Employed best practices and coding standards to write clean, modular, and maintainable code.
  - Write unit tests for frontend and backend components to ensure code quality and reliability.
  - Conduct thorough testing of the application to identify and fix bugs, ensuring a smooth user experience.
  - Collaborated closely with UI/UX designers to translate wireframes and mockups into interactive and visually appealing user interfaces.

2. Device Management System (June 2023 - December 2023)

- Position: Developer
- Team size: 8
- Technology: ReactJS
- Responsibility:
  - Develop various components using React.js, ensuring high performance and scalability.
  - Employed best practices and coding standards to write clean, modular, and maintainable code.
  - Collaborated closely with UI/UX designers to translate wireframes and mockups into interactive and visually appealing user interfaces.
  - Write unit tests for frontend and backend components to ensure code quality and reliability.
  - Documented codebase extensively to facilitate seamless collaboration among team members and ensure comprehensibility for future reference.

3. Smart Traffic Ecosystem (October 2022 - May 2023)

- Position: Developer
- Team size: 5
- Technology: ReactJS, NestJS
- Responsibility:
  - Developed a web-based product for a traffic ecosystem, featuring real-time tracking and monitoring of vehicles
  - Design REST API for back-end system
  - Employed best practices and coding standards to write clean, modular, and maintainable code.
  - Documented codebase extensively to facilitate seamless collaboration among team members and ensure comprehensibility for future reference.

DEK Technologies Vietnam
Intern

Ho Chi Minh, Vietnam
July 2022 - September 2022

Chat Application (July 2022 - September 2022)

- Position: Member
- Team size: 5
- Technology: C++, Docker, Kubenetes, GitLab
- Responsibility:
  - Developed and maintained a multi-client chat service
  - Worked within Agile/Scrum methodology to deliver incremental and high-quality software updates.
  - Packaged applications and managed containerized environments using Docker for streamlined deployment and scalability.
  - Deployed microservices-based applications using Kubernetes, ensuring robust orchestration and management.
  - Established and maintained CI/CD pipelines, incorporating basic testing to support automated and efficient development workflows.
