PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of professional experience building and maintaining web and mobile applications for large-scale, international projects. Strong expertise in modern frontend technologies (React, Next.js, React Native) and full-stack development with Node.js frameworks (Express, NestJS). Proven ability to deliver high-quality features, optimize performance, integrate third-party APIs, and collaborate effectively within Agile, cross-functional teams. Experienced with cloud platforms (AWS, Azure) and CI/CD pipelines, with a strong focus on reliability, scalability, and business impact.

WORK EXPERIENCE

FPT Software — Software Engineer

Ho Chi Minh City, Vietnam | October 2022 – Present

1. Large-Scale E-commerce Web Platform (July 2025 – Present)

Tech stack: React, Node, AWS, GitLab CI/CD, Jenkins

- Developed and maintained core frontend modules, including product listing, search flows, and shared UI components, supporting a high-traffic e-commerce platform.
- Designed and implemented reusable, scalable React components, improving code maintainability and consistency across multiple teams.
- Optimized frontend performance using code splitting, lazy loading, and rendering optimizations, contributing to faster page load times and improved user experience.
- Investigated and resolved production issues across multiple modules, reducing recurring incidents and improving overall platform stability.
- Collaborated closely with QA, DevOps, and product teams to deliver features aligned with business requirements and release timelines.
- Supported CI/CD workflows by integrating with GitLab CI/CD and Jenkins pipelines managed by the DevOps team, enabling reliable automated builds and deployments.
- Assisted with application deployment and monitoring on AWS, ensuring smooth release cycles and high availability in production environments.
- Contributed to continuous improvements in development workflows, code quality standards, and deployment efficiency.

2. Employee Hub App (January 2025 - June 2025)

Tech stack: React Native, Redux Toolkit

- Developed and maintained core features for human resource management, internal communications, and corporate engagement on the Employee Hub App.
- Integrated third-party services and APIs, enhancing the platform's capabilities and improving employee experience.
- Optimized app performance, reducing average load time by 30% and ensuring compatibility across major mobile devices.
- Implemented state management with Redux Toolkit, improving data consistency and reducing state-related bugs by 40%.

- Resolved 20+ critical production issues, increasing system reliability and user satisfaction.
- Collaborated with a 20-member cross-functional team to successfully deliver new features on schedule

3. Booking System (January 2024 - December 2024)

Tech stack: ReactJS, ExpressJS, PostgreSQL

- Designed and implemented a seamless booking flow with availability search, reservation management, and dynamic forms.
- Developed admin panel features for managing reservations, CRM operations, and integrating mapping APIs.
- Improved booking success rate by 25% through UX enhancements and backend optimization.
- Wrote over 80 unit tests for frontend and backend components, achieving a 90%+ test coverage rate.
- Led API integration efforts with third-party services, reducing external dependency issues by 50%.
- Regularly collaborated with 18 team members, ensuring efficient workflow alignment.

4. Device Management System (June 2023 - December 2023)

Tech stack: ReactJS, Redux Toolkit

- Developed key components with React.js for a secure, scalable admin platform.
- Collaborated with UI/UX designers to implement intuitive and responsive user interfaces.
- Applied coding best practices and modular architecture.
- Developed unit tests using JEST for React components.
- Maintained clear, accessible project documentation for team efficiency.

5. Smart Traffic Ecosystem (October 2022 - May 2023)

Tech stack: ReactJS, NestJS, Azure, PostgreSQL

- Built data visualization features using React.js and D3.js.
- Designed and implemented REST APIs with NestJS.
- Integrated secure TLS data transfer between Azure-hosted VMs.
- Maintained modular, maintainable codebases and thorough project documentation.

EDUCATION

University of Information Technology - UIT

Bachelor of Information Systems | GPA: 3.37 (Aug 2019 – Dec 2023)

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript
- **Frameworks:** ReactJS, VueJS, React Native, ExpressJS, NextJS, NestJS
- **Databases:** PostgreSQL, MySQL, SQL Server, Oracle
- **Cloud Platforms:** Azure, AWS
- **Tools:** Git, Docker

CERTIFICATES AND ACHIEVEMENTS

- TOEIC 880
- EnglishScore English Proficiency Certificate (B2)
- AZ900 - Azure Fundamentals
- DP900 - Azure Data Fundamentals
- Udacity: Cloud Developer
- Udacity: Cloud DevOps Engineer
- Udacity: Agile Software Developer

ADDITIONAL LEARNING

- Udemy: React - The Complete Guide 2024 (incl. React Router & Redux)
- Udemy: Next.js 14 & React - The Complete Guide
- Udemy: NestJS Zero to Hero - Modern TypeScript Back-end Development
